

FIELD TRIP TO DAMBUK, ARUNACHAL PRADESH

The 6th Semester Botany Major students of DHSK College undertook an enriching field trip to Dambuk on 12/2/2025 under the guidance of their teachers Mr. Ambarish Bhuyan, Mr. Abhilash Bhattacharjee, Ms. Rajashree Duari, and Ms. Kumudi Devi. The excursion provided the students with valuable exposure to the rich biodiversity and unique vegetation of the region, enabling them to practically observe and study various plant species in their natural habitats. The teachers not only guided the students in plant identification and ecological documentation but also encouraged discussions on the importance of conservation and sustainable use of natural resources. The field trip served as a bridge between classroom learning and real-world application, fostering both scientific curiosity and environmental awareness among the students.
